Alarm Siting

Aico, an Ei Company, is the European market leader in home life safety. With integrated fire, CO, and environmental sensors. Their UK-standard alarms and sensors are manufactured in Ireland, while their advanced software, developed in Bristol, provides real-time insights. By combining trust and innovation, Aico aims to create safer, healthier, and more sustainable homes.

Smoke

Hallway & Landing

- Site less than 3m from any bedroom door
- Site between high-risk rooms and bedrooms
- Site away from bathroom door
- Site within 7.5m of any point within the area to be protected

Stairways

- Site an alarm centrally on the ceiling in the hallways
- Do not site alarms on the wall or any sloping parts of the ceiling

Heat

Kitchen

- Centrally site - 5.3m radius of coverage
- Consider location of alarm and sources of heat e.g. cooker/hobs
- Heat alarms should be ceiling-mounted only
- Heat alarms can also be sited in garages following the same guidance as above

Carbon Monoxide

With a fuel-burning appliance

- Site on the ceiling at least 300mm from walls or any other obstruction
- 1-3m horizontally from the appliance
- If more than one appliance is in the room, site in between both appliances

Without a fuel-burning appliance

- In bedrooms, site at breathing height
